Joram Kate Leonardo

Full Stack Web Developer

Detail-oriented Full Stack Web Developer with experience in developing, maintaining, and deploying web-based information systems for government projects. Skilled in Laravel, Vue.js, React, Inertia.js, MySQL, Tailwind CSS, database-driven application development, and AI-assisted development tools. Experienced in database administration, system customization, user support, system deployment, and project coordination, with a strong ability to translate operational requirements into functional and user-friendly systems.

Experience

Computer Programmer II
DOST-STII | March 2021 - Present

- Analyze, design, and implement information systems and database.
- Facilitate system development, customization, deployment, and maintenance.
- Manage database administration and system maintenance activities.
- Conduct system deployment, user training, and technical support.

Project Assistant II
DOST-MIMAROPA | January 2020 - February 2021

- Assisted in the implementation of the “Rollout of RxBox Units” project.
- Facilitated the distribution and deployment of RxBox units.
- Coordinated closely with the RxBox RMT and RHU teams.
- Provided secretariat support for meetings, documentation, and other project-related activities.

Computer Maintenance Technologist I
DOST-STII | July 2019 - February 2021

- Developed and implemented a Knowledge Management System.
- Facilitated system deployment and user training.
- Provided hardware and software technical support to end users.

Computer Operator IV
DOST-STII | July 2018 - March 2019

- Analyzed, designed, and implemented information systems.
- Assisted in system development, deployment, and training activities.

Projects

DOST-STII Library Online Public Access Catalog (OPAC)
Technologies: Laravel 12, PHP 8.2, React 18, TypeScript, Inertia.js, Tailwind CSS, MySQL, Vite, Node.js

A web-based Online Public Access Catalog for the DOST SciNET-PHIL union catalog, allowing users to search and browse library materials across DOST libraries and information centers.

DOSTv Project Management System
Technologies: Laravel 10, PHP 8.1+, Vue.js 3, Inertia.js, MySQL, Tailwind CSS, Vite, Axios, Chart.js, Node.js

A web-based system that manages the full lifecycle of TV production projects, including project setup, task assignment, progress tracking, file submission, review, and monitoring.

DOST Multimedia Collection
Technologies: Laravel 12, Vue 3, Inertia.js, MySQL, Tailwind CSS, Vite, Laravel Sanctum, Node.js, Data Visualization with Chart.js

A role-based multimedia archive and publishing system for managing DOST event albums, photos, and videos. It includes an internal workflow where authors prepare multimedia event collections, publishers review and publish content, and selected events can be featured or promoted as upcoming events. The system also includes a public-facing website where clients can search, browse, and access media resources such as photos and videos from DOST events.

DOST-STII Ticketing Management System
Technologies: Laravel 12, PHP 8.2, Vue 3, Inertia.js, Tailwind CSS, MySQL, Laravel Sanctum, Pest, Chart.js, Node.js, Queued Email Workflows, Google Sheets API

A centralized ticket monitoring and administration system designed to manage service requests efficiently. It includes a public-facing website where clients can submit requests for assistance, while the internal dashboard allows staff to monitor, search, filter, update, and manage tickets. The system supports status tracking, pagination, ticket creation, ticket detail viewing, updates, deletion, and the complete administrative workflow from request submission to resolution.
